ASSUMPTIONS

Climate-controlled storage — baseline price	**$130 / NRSF · Derived estimate — verify (industrial/self-storage-climate.json)**
Climate-controlled storage — factors	**regional 0.85 · quality 1 · size 0.9972 · escalation 1.0523**
Climate-controlled storage — research note	**Multi-story (typically 3–5 stories) interior-access climate-controlled storage on 1.5–4 acre infill sites. Cost drivers: structural system (steel/PEMB vs. concrete podium), number of stories and elevators, unit-mix partitions and roll-up doors, HVAC, and efficiency (rentable vs gross area 70–80%). Public evidence is a scatter of announced project costs (Inside Self Storage roundups) whose scope (construction vs total, gross vs rentable) is unclear, plus one vendor cost table; the default is a reasoned midpoint, medium-low confidence.**
Phase 1 — schedule	**2027-03, 14 months, midpoint 2027-10, escalation 5.23% (forecast rates from _indices/escalation.json)**
Phase 1 — financing	**LTC 60%, rate 7.00%, fee 1.00%**
