Ashley River Marina

Charleston, SC

TOTAL PROJECT COST	PER SF	PER SLIP	HARD / SOFT / LAND
$21,008,592	**—**	**$105,043**	**64 / 19 / 17%**

COST SUMMARY

Construction hard cost	**$11,134,985**
FF&E	**$0**
Design + construction contingency	**$2,338,347**
Hard cost subtotal	**$13,473,332**
Soft costs	**$2,529,947**
Impact & tap fees	**$0**
Developer fee	**$645,076**
Financing (interest + fees)	**$630,628**
Soft cost contingency	**$123,610**
Soft cost subtotal	**$3,929,260**
Land & acquisition	**$3,606,000**
Total project cost	**$21,008,592**

BASIS

Location	**Charleston, SC (factor 0.900)**
Gross building SF	**—**
Site acres	**—**
Cost per acre	**—**
Research data version	**2026.7c60a42879**
Engine	**budget-engine-2.0.0**

All defaults come from the research data shipped with the app (2026.7c60a42879), escalated to the construction midpoint and adjusted to the project location. Values marked "Derived estimate — verify" have no direct published source.

Sources & Assumptions

ASSUMPTIONS

Marina — baseline price	**$60,000 / slip · Researched (marine-other/marina.json)**
Marina — factors	**regional 0.9 · quality 1 · size 0.9772 · escalation 1.0592**
Marina — research note	**Per-slip cost is driven by slip length/vessel class, dock system (timber vs. concrete floats, steel vs. concrete**

	piles), utilities (power, water, fire suppression, pump-out) and exposure (wave attenuation). Site-specific heavy items — dredging, breakwaters, bulkheads, fuel systems — vary by orders of magnitude and are carried as separate line items. Evidence is a set of recent public project budgets (USFWS Boating Infrastructure Grant FY2025-26 summaries, Treasure Island, Berkeley); these are total project costs for transient facilities, so the default is medium confidence.
Phase 1 — schedule	**2027-03, 18 months, midpoint 2027-12, escalation 5.92% (forecast rates from _indices/escalation.json)**
Phase 1 — financing	**LTC 60%, rate 7.00%, fee 1.00%**
